## ■ Add Device

Make sure the device is in configuration mode

- Power on the device. If it is in first time use, it will be in smart configuration mode automatically, otherwise you may need to reset it.
- When the device is in smart configuration mode, follow the wizard in App to add device, name it and assign it to a room.
- If you have difficulties to add device in smart configuration mode, please refer to **Indications** to try AP configuration.
- In device page, tap "Add remote" and follow the wizard to add a virtual remote for your IR or RF device.
- If any button is not functional, please select "Learn buttons" from menu in remote panel and tap the button to start learning until the button is tested working.

## Overview Unit: mm

RM pro x 1

USB cable x 1

## ■ Indications

Status	Indication

### **Reset for Smart Configuration**

- Press and hold the reset (on/off) button using a needle for 6s until the LED flashes quickly.

### **Reset for AP Configuration**

- Only when the LED flashes quickly, press and hold the reset (on/off) button using a needle for another 6s until the LED flashes quickly and off alternatively.

## ■ Prepare App

- Download "BroadLink" App from the App Store or Google Play by searching or scanning the QR code.
- Open the App, sign up an account and follow the wizard to set up your home for first use.

### **NOTE:**

- Make sure your phone is connected to 2.4GHz Wi-Fi network before adding device (5GHz is not supported).
- The Wi-Fi password should contain no more than 32 characters and no special characters which are not available on standard keyboard layout.
