

"How do I connect Amazon Echo to external speakers?" : "To connect Amazon Echo to external speakers, you can use a 3.5mm audio cable or pair via Bluetooth. In the Alexa app, go to 'Devices,' select your Echo, and configure the speaker settings under 'Audio Settings.'",

"How do I enable skills on Amazon Echo?" : "To enable skills on Amazon Echo, open the Alexa app, go to 'Skills & Games,' and browse or search for the skill you want to enable. Tap 'Enable' to add it to your Echo. You can also use voice commands like 'Alexa, enable [skill name].'",

"How do I set up Drop In on Amazon Echo?" : "To set up Drop In, open the Alexa app, go to 'Devices,' select your Echo, and enable 'Drop In' under 'Communications.' You can also configure permissions for specific contacts or devices to use Drop In.",

"How can I change the Wi-Fi network for Google Nest Hub?" : "To change the Wi-Fi network for Google Nest Hub, open the Google Home app, select your Nest Hub, and tap on 'Settings' > 'Wi-Fi' > 'Forget Network.' Then follow the prompts to connect to a new network.",

"How can I set up routines on Google Nest Hub?" : "To set up routines on Google Nest Hub, open the Google Home app, tap 'Routines,' and create a new routine by setting the trigger (e.g., voice command or schedule) and choosing actions for Google Assistant to perform, such as turning on lights or playing music.",

"How can I control smart home devices using Apple HomePod?" : "To control smart home devices using Apple HomePod, make sure your devices are added to the Home app. You can then ask Siri on HomePod to control lights, thermostats, and other smart home devices.",

"How do I change the language on Apple HomePod?" : "To change the language on Apple HomePod, open the Home app, select your HomePod, go to 'Settings,' and choose 'Language' to pick your preferred language for Siri.",

"How do I set a timer on Apple HomePod?" : "To set a timer on Apple HomePod, say 'Hey Siri, set a timer for [duration].' You can also ask Siri to check the remaining time or cancel the timer.",

"How do I set up a reminder on Apple HomePod?" : "To set up a reminder, say 'Hey Siri, remind me to [task] at [time].' The reminder will be added to your Reminders app linked to your Apple ID.",

"How can I set up shortcuts on Apple HomePod?" : "To set up shortcuts, use the Shortcuts app on your iPhone. You can create custom shortcuts and use Siri on HomePod to activate them by saying 'Hey Siri, run [shortcut name].'",

"How do I enable sleep sounds on Apple HomePod?" : "To enable sleep sounds, say 'Hey Siri, play sleep sounds.' You can also specify the type of sound, such as ocean waves or rain, for a more customized experience.",

"How do I set a sleep timer for music on Apple HomePod?" : "To set a sleep timer, say 'Hey Siri, stop playing in [duration].' HomePod will stop the music after the specified time.",

"How do I connect Philips Hue to Google Assistant or Alexa?" : "To connect Philips Hue to Google Assistant or Alexa, open the Google Home or Alexa app, select 'Add Device,' and follow the prompts to link your Philips Hue account and control your lights using voice commands.",

"How do I use Philips Hue lights for wake-up routines?" : "To use Philips Hue lights for wake-up routines, open the Hue app, tap 'Routines,' and select 'Wake Up.' Set the time and choose which lights will gradually brighten to help you wake up naturally.",

"How do I enable geofencing with Philips Hue?" : "To enable geofencing, open the Hue app, go to 'Routines,' and select 'Coming Home' or 'Leaving Home.' Enable location access to automatically control your lights based on your location.",

"How do I use Philips Hue with IFTTT?" : "To use Philips Hue with IFTTT, create an account on IFTTT, link your Philips Hue account, and set up applets to automate actions based on triggers, such as turning on lights when you receive a text.",

"How can I set up LIFX lights for the first time?" : "To set up LIFX lights for the first time, screw in the LIFX bulbs and turn on the light switches. Download the LIFX app on your smartphone, follow the on-screen instructions to connect your LIFX lights to Wi-Fi, and complete the setup.",

"How do I reset LIFX bulbs?" : "To reset LIFX bulbs, turn the light on and off five times until the bulb flashes. This indicates that the bulb has been reset and is ready to be set up again.",

"How do I set schedules for LIFX lights?" : "To set schedules, open the LIFX app, tap 'Schedules,' and create a new schedule to turn lights on or off automatically based on time or specific days of the week.",

"How do I rename LIFX bulbs?" : "To rename LIFX bulbs, open the LIFX app, select the light, tap 'Settings,' and enter a new name for the bulb.",

"How do I troubleshoot LIFX lights that are flickering?" : "If LIFX lights are flickering, ensure they are compatible with your light fixtures, check the wiring, and verify that the bulbs are securely screwed in.",

"How do I control LIFX with multiple devices?" : "To control LIFX with multiple devices, install the LIFX app on each device and log in with the same LIFX account to sync settings across devices.",

"How do I use LIFX lights as a visual alert?" : "To use LIFX lights as a visual alert, set up an applet in IFTTT to flash your LIFX lights when a specific event occurs, such as receiving an email or a doorbell ring.",

"How do I enable color cycles on LIFX?" : "To enable color cycles, open the LIFX app, select the light or group, go to 'Effects,' and choose 'Color Cycle' to have the lights automatically transition through different colors.",

"How do I control LIFX lights with SmartThings?" : "To control LIFX lights with SmartThings, add the LIFX integration in the SmartThings app, link your LIFX account, and control your lights from the SmartThings app.",

"How do I reset the Wi-Fi settings on TP-Link Smart Plug?" : "To reset the Wi-Fi settings, press and hold the power button for 5 seconds until the LED blinks amber. Use the Kasa app to set up the plug again with the new network.",

"How do I troubleshoot unresponsive TP-Link Smart Plug?" : "If TP-Link Smart Plug is unresponsive, try restarting it by unplugging and plugging it back in. Ensure it is connected to the correct Wi-Fi network and use the Kasa app to check for connectivity issues.",

"How do I enable geofencing with TP-Link Smart Plug?" : "To enable geofencing, use third-party apps like IFTTT to create a trigger that automatically controls the TP-Link Smart Plug based on your location.",

"How do I disable the LED on TP-Link Smart Plug?" : "To disable the LED, open the Kasa app, select the plug, go to 'Device Settings,' and toggle the 'LED Status' setting to off.",

"How do I set up TP-Link Smart Plug with Home Assistant?" : "To set up TP-Link Smart Plug with Home Assistant, add the TP-Link Kasa integration in Home Assistant and follow the prompts to connect your plug for local control.",

"How do I share control of TP-Link Smart Plug with others?" : "To share control, open the Kasa app, go to 'Device Settings,' and select 'Device Sharing.' Enter the email address of the person you want to share control with.",

"How do I disable remote control on TP-Link Smart Plug?" : "To disable remote control, open the Kasa app, select the plug, go to 'Device Settings,' and toggle off the 'Remote Control' option.",

"How do I adjust the power settings on TP-Link Smart Plug?" : "TP-Link Smart Plug does not have adjustable power settings, but you can use the Kasa app to monitor energy usage and set schedules to control power consumption.",

"How do I update the Wi-Fi settings for TP-Link Smart Plug after moving?" : "To update the Wi-Fi settings after moving, reset the plug by holding the power button for 5 seconds and use the Kasa app to reconnect to the new network.",

"How can I set up Kasa Smart Bulbs for the first time?" : "To set up Kasa Smart Bulbs, screw in the bulb, turn on the light switch, download the Kasa app, and follow the on-screen instructions to connect the bulb to your Wi-Fi network.",

"How do I reset Kasa Smart Bulbs?" : "To reset Kasa Smart Bulbs, turn the light on and off three times until the bulb blinks rapidly. This indicates that the bulb has been reset and is ready to be set up again.",

"How do I change the Wi-Fi network for Kasa Smart Bulbs?" : "To change the Wi-Fi network for Kasa Smart Bulbs, open the Kasa app, select the bulb, and go to 'Device Settings.' Tap 'Wi-Fi Network' and follow the prompts to reconnect to a new network.",

"How do I control Kasa Smart Bulbs remotely?" : "To control Kasa Smart Bulbs remotely, ensure 'Remote Control' is enabled in the Kasa app. This feature allows you to manage your bulbs from anywhere using your smartphone.",

"How do I rename Kasa Smart Bulbs?" : "To rename Kasa Smart Bulbs, open the Kasa app, select the bulb, tap 'Device Settings,' and enter a new name for the bulb.",

"How do I set up voice control for Kasa Smart Bulbs with Siri?" : "Kasa Smart Bulbs are not natively compatible with Siri. You can set up voice control with Siri using third-party integrations like Shortcuts or Homebridge.",

"How do I use Kasa Smart Bulbs with IFTTT?" : "To use Kasa Smart Bulbs with IFTTT, create an account on IFTTT, link your Kasa account, and set up applets to automate actions based on triggers, such as turning on the bulb when you arrive home.",

"How do I control Kasa Smart Bulbs with multiple devices?" : "To control Kasa Smart Bulbs with multiple devices, install the Kasa app on each device and log in with the same Kasa account to sync settings across devices.",

"How do I update the firmware of Kasa Smart Bulbs?" : "To update the firmware, open the Kasa app, go to 'Device Settings,' and tap 'Update Firmware' if an update is available.",

"How do I install LG Washer and Dryer (Model WM3998HBA)?" : "Installation OverviewPlease read the following installation instructions first after purchasing this washer or transporting it to another location.a Choosing the Proper Locationb Unpacking and Removing Shipping Materialc Connecting the Inlet Hosesd Connecting the Drain Hosee Leveling the Washerf Final Installation Check",

"How do I choose the proper location for LG Washer and Dryer (Model WM3998HBA)?" :
 "Choosing the Proper Location Check the following requirements for the install location before installing the washer. • Allow for sufficient space between the walls and the washer for installation. • Make sure that the floor is clean, dry and free of dust, dirt, water and oil so the leveling feet cannot slide easily. Leveling feet that can move or slide on the floor can contribute to excess vibration and noise. • If the floor has too much flex, reinforce it to make it more rigid. If the floor is not solid, it may cause severe vibration and noise. • If a drain pan must be used, take extra care to follow the instructions provided with the drain pan and make sure the leveling feet are adjusted for firm and even contact with the pan. Use of drain pans and failure to properly level the washer may result in increased vibration and noise during operation. Power Outlet • The power outlet must be within 60 inches (1.5m) of either side of the washer. • Position the washer so that the outlet and plug are easily accessible. • Do not overload the outlet with more than one appliance. • The outlet must be grounded in accordance with current electrical wiring codes and regulations. • Use a time-delay fuse or circuit breaker. • It is the personal responsibility and obligation of the washer owner to have a proper outlet installed by a qualified electrician. Flooring • To minimize noise and vibration, install the washer on a level, solidly constructed floor capable of supporting the washer without flexing or bouncing. • The washer must be installed on firm flooring to minimize vibration during the spin cycle. Concrete flooring is best, but a wood floor is sufficient, provided it is built to FHA standards. • The floor under the washer must not slope more than 1 inch (2.5 cm) from front to back or side to side. • Installing on carpeting and soft tile surfaces is not recommended. • Never install the washer on a platform or weakly supported structure. Floor Installation To ensure sufficient clearance for water inlet hoses, drain hose and airflow, allow minimum clearances of at least 1 inch (2.5 cm) at the sides and 4 inches (10 cm) behind the washer. Be sure to allow for wall, door, or floor moldings that may increase the required clearances. Dimensions and Clearances A 24 3/4" (62.6 cm) B 55" (139.6 cm) C 30 1/4" (77 cm) D 4" (10 cm) E 1' (25 cm) F E G D C B A",

"How do I unpack and remove shipping material for LG Washer and Dryer (Model WM3998HBA)?" : "Unpacking and Removing Shipping Material Remove all shipping materials from the washer for proper operation and inspect it for shipping damage. CAUTION • Failure to remove shipping materials can cause excessive noise and vibration. Unpacking Shipping Material *Some models do not ship with drum support. Lift the washer off the foam base. • After removing the carton and shipping material, lift the washer off the foam base. • Make sure the plastic drum support * comes off with the base and is not stuck to the bottom of the washer. • If you must lay the washer down to remove the carton base, always protect the side of the washer and lay it carefully on its side. Do not lay the washer on its front or back. Removing Shipping Material 1 Remove the bolt assemblies. • Starting with the bottom two shipping bolts, use the included wrench to fully loosen all 4 shipping bolts by turning them counterclockwise. • Remove the bolt assemblies (bolts and retainers) by wiggling them slightly while pulling them out. 2 Install the hole caps. • Locate the hole caps included in the accessory pack or attached to the back of F 27" (70 cm) G 1' (25 cm) Dimensions and Clearances A 30 1/4" (77 cm) B 4" (10 cm) C 1' (25 cm) D 1' (25 cm) E 1' (25 cm) F 27" (70 cm) G 1' (25 cm) H 1' (25 cm) I 1' (25 cm) J 1' (25 cm) K "How do I connect the water inlet hoses for LG Washer and Dryer (Model WM3998HBA)?" :
"Connecting the Water InletHosesTo avoid the risk of costly water damage, purchaseand install new water inlet hoses when installingthe washer.WARNING• Do not overtighten the hoses or cross-thread thehose fittings. Overtightening or cross-threadingcan damage the valves or couplings, resulting inleaking and property damage. • Do not reuse old hoses. Use only new hoseswhen installing the washer. Old hoses could leakor burst causing flooding and property damage.Contact an LG Customer Information Center forassistance in buying hoses.NOTE• Periodically check the hoses for cracks, leaks,and wear, and replace the hoses every five years. • Do not stretch the water hoses intentionally, andmake sure that they are not pinched, crushed orkinked by other objects. • Water supply pressure must be between 20 psiand 120 psi (138 - 827 kPa). If the water supplypressure is more than 120 psi, a pressurereducing valve must be installed. • Your hot water heater should be set to deliverwater at 120–135 °F (48–57 °C) to allow thewasher to properly control wash temperatures. • Do not store or install th e washer in a locationsubject to freezing temperatures. Damage to thewater inlet hoses and internal mechanisms ofthe washer can result. If the washer wasexposed to freezing temperatures prior toinstallation, allow it to stand at roomtemperature for several hours before use andcheck for leaks prior to operation. • Do not use flood-preven ting hoses with autoshut off devices. The devices can be trippedduring fill and prevent the washer from fillingproperly.How to Connect the Water InletHoses1 Check the fittings and seals. Inspect the threaded fitting on each hose and make surethere is a rubber seal a in place in both endsof each hose to prevent leaking.2 Connect the water supply hoses. • Connect the water inlet hoses to the hotand cold water faucets tightly by hand andthen tighten another 2/3 turn with pliers. • Connect the blue hose to the cold waterfaucet and the red hose to the hot waterfaucet.3 Flush out the inlet hoses. • After the hoses are connected, turn on thewater faucets and flush out any foreignsubstances such as dirt, sand, or sawdust.13INSTALLATIONENGLISH• Let the water drain into a bucket, and checkthe water temperature to make sure you'veconnected the hoses to the correct faucets.4 Attach the inlet hoses to the back of thewasher. • Attach the hot water inlet hose to the hotwater inlet on the back of the washer.Attach the cold water inlet hose to the coldwater inlet on the back of the washer. • Tighten the fittings securely. Turn on bothfaucets all the way and check for leaks atboth ends of the hoses.",

"How do I connect the drain hose for LG Washer and Dryer (Model WM3998HBA)?" :
"Connecting the Drain HoseConnect the drain hose to either a standpipe orlaundry tub.WARNING• The drain hose should always be properlysecured. Failure to properly secure the drainhose can result in flooding and propertydamage.NOTE• The drain must be instal led in accordance withany applicable local codes and regulations. • Make sure that the drain hose is not stretched,pinched, crushed, or kinked. • The end of the drain hose should be located aminimum of 24' (61 cm) and a maximum of 96'(244 cm) above the bottom of the washer. • For best results, locate the end of the drain hoseno higher than 66' (168 cm) above the bottomof the washer. As the drain outlet is raisedbeyond 66' (168 cm), the drain

function will be increasingly affected.

- Never create an airtight seal between the hose and the drain with tape or other means. If no airgap is present, water can be siphoned out of the drum resulting in poor wash/rinse performance or clothing damage.

Using a Standpipe to Drain

- 1 Clip the end of the hose into the elbow bracket.
- Connect the elbow bracket a within 4 inches (10 cm) of the end of the drain hose. If the drain hose is extended more than 4 inches (10 cm) beyond the end of the elbow bracket, mold or microorganisms could spread to the inside of the washer.
- 2 Insert the end of the drain hose into the standpipe.
- 3 Use the provided tie strap b to secure the drain hose in place.
- 4 If the water valves and drain are built into the wall, fasten the drain hose to one of the water hoses with the provided tie strap c (ribbed side on inside).

Using the Laundry Tub to Drain

- 1 Clip the end of the hose into the elbow bracket.
- Connect the elbow bracket a within 4 inches (10 cm) of the end of the drain hose. If the drain hose is extended more than 4 inches (10 cm) beyond the end of the elbow bracket, mold or microorganisms could spread to the inside of the washer.
- 2 Hang the end of the drain hose over the side of the laundry tub.
- 3 Use the provided tie strap to secure the drain hose in place."

"How do I level LG Washer and Dryer (Model WM3998HBA)?" : "Leveling the Washer

The drum of the washer spins at very high speeds. To minimize vibration, noise, and unwanted movement, the floor must be a solid, level surface.

CAUTION

- Using the washer without leveling it may cause excess vibration and noise, leading to a washer malfunction.

Adjust the leveling feet only as far as necessary to level the washer. Extending the leveling feet more than necessary can cause the washer to vibrate.

NOTE

- Before installing the washer, make sure that the floor is clean, dry and free of dust, dirt, water and oil so the washer feet cannot slide easily. Feet that move or slide on the floor can contribute to excessive vibration and noise.

How to Level the Washer

- 1 Position the washer in its final location.
- Take special care not to pinch, strain, or crush the water and drain hoses. If you have a carpenter's level a, you can use it to check that the washer is level. The slope beneath the washer should not exceed 1 inch, and all 4 leveling feet must rest firmly on the floor.

24 - 96" (61 - 244 cm)

24 - 96" (61 - 244 cm)

4" (10 cm)

15 INSTALLATION ENGLISH

- 2 Adjust the leveling feet.
- Turn all 4 leveling feet in one direction to raise the washer or the other direction to lower it.
- 3 Check the level again.
- Push or rock the top edges of the washer gently to make sure the washer does not rock. If the washer rocks, readjust the leveling feet.
- 4 Tighten the locknuts b.
- Turn the locknuts counterclockwise and tighten them when the washer is level.

Using Non-Skid Pads

If you install the washer on a slippery surface, it may move because of excessive vibration. Incorrect leveling may cause malfunction through noise and vibration. If this occurs, install the non-skid pads under the leveling feet and adjust the level.

- 1 Clean the floor to attach the non-skid pads.
- Use a dry rag to remove and clean foreign objects or moisture. If moisture remains, the non-skid pads may slip.
- 2 Adjust the level after placing the washer in the installation area.
- 3 Place the adhesive side c of the non-skid pad on the floor.
- It is most effective to install the non-skid pads under the front leveling feet. If it is hard to place the pads under the front leveling feet, place them under the back leveling feet.

a This side up

Remove backing

- 4 Recheck the washer's levelness.
- Push or rock the top edges of the washer gently to make sure the washer does not rock. If the washer rocks, level the washer again."

"How do I complete the final installation check for LG Washer and Dryer (Model WM3998HBA)?" : "Final Installation Check
Connecting to the Power Supply
Plug the washer into a 120 V, 60 Hz grounded 3-prong outlet.
WARNING• Do not use a worn or damaged power cord or power plug. Replace or repair it immediately. Failure to do so may result in death, fire, electric shock, or malfunction.
• Do not modify the power cord and plug provided with the appliance. Do not damage it when installing or moving the appliance. Doing so may result in death, fire, electric shock, or malfunction.
• Make sure that the appliance is grounded.
• Connect this appliance to a grounded outlet conforming to the rating prior to use. Failure to do so may result in fire, electric shock, or malfunction.
• Do not damage or cut off the ground prong of the power cord. Doing so may cause death, fire, electric shock, or product malfunction.
• Improper connection of the equipment grounding conductor can result in risk of electric shock. Check with a qualified electrician or service technician if you are in doubt as to whether the appliance is properly grounded. If the plug does not fit the outlet, have a proper outlet installed by a qualified electrician.
• The appliance and outlet must be positioned so that the plug is easily accessible.
16 INSTALLATION WARNING• Do not use an adapter or extension cord. Doing so may result in serious injury, fire, electric shock, or death.
• For best performance, plug the appliance into its own individual outlet. This helps prevent overloading house wiring circuits which could cause a fire hazard from overheated wires.
• If necessary, use a new, UL-listed 3-prong (grounding) plug rated at no less than the branch circuit. Do not use an extension cord longer than 3 feet. Failure to follow these warnings may result in serious injury, fire, electric shock, or death."

"How do I test LG Washer and Dryer (Model WM3998HBA) after installation?" : "Testing the Washer
Check if the washer is properly installed and run a test cycle.
1 Load the washer with 6 thick bath towels (approximately 6 pounds).
2 Press the Power button.
3 Press the Rinse+Spin button.
4 Press the Start/Pause button to start the wash cycle.
5 Make sure that water is supplied, that the washer does not rock or vibrate excessively, and that it drains well during the spin cycle.
NOTE• If water leaks during water supply, see Connecting the Water Inlet Hoses to connect them properly.
• If the washer rocks and vibrates excessively, see Leveling the Washer to level it again.
• If the drain does not work, see Connecting the Drain Hose to install the hose properly."

"What should I check before using the LG ThinQ application with LG Washer and Dryer (Model WM3998HBA)?" : "Before Using LG ThinQ Application
1 Check the distance between the appliance and the wireless router (Wi-Fi network).
• If the appliance is too far from the router, the signal strength becomes weak. It may take a long time to connect or installation may fail.
2 Turn off the Mobile data or Cellular Data on your smartphone.
3 Connect your smartphone to the wireless router.
NOTE• To verify the Wi-Fi connection, check that the Wi-Fi icon on the control panel is lit.
• The appliance supports 2.4 GHz Wi-Fi networks only. To check your network frequency, contact your Internet service provider or refer to your wireless router manual.
• LG ThinQ is not responsible for any network connection problems or any faults, malfunctions, or errors caused by network connection.
• If the appliance is having trouble connecting to the Wi-Fi network, it may be too far from the router. Purchase a Wi-Fi repeater (range extender) to improve the Wi-Fi signal

strength. • The Wi-Fi connection may not connect or may be interrupted because of the home network environment. • The network connection may not work properly depending on the Internet service provider. • The surrounding wireless environment can make the wireless network service run slowly. 34 SMART FUNCTIONS NOTE • If the appliance cannot be registered due to problems with the wireless signal transmission, unplug the appliance and wait about a minute before trying again. • If the firewall on your wireless router is enabled, disable the firewall or add an exception to it. • The wireless network name (SSID) should be a combination of English letters and numbers. (Do not use special characters.) • Smartphone user interface (UI) may vary depending on the mobile operating system (OS) and the manufacturer. • If the security protocol of the router is set to WEP, network setup may fail. Change the security protocol (WPA2 is recommended) and connect the product again.",

"How do I install the LG ThinQ application for LG Washer and Dryer (Model WM3998HBA)?" : "Installing the LG ThinQ Application Search for the LG ThinQ application from the Google Play Store or Apple App Store on a smartphone. Follow instructions to download and install the application.",

"What is the operation overview for using LG Washer and Dryer (Model WM3998HBA)?" : "Operation Overview 1 Sort laundry and load the washer. • Sort laundry by fabric type, soil level, color and load size as needed. Open the door and load items into the washer. • If using single-use detergent packs, or gel or tablet detergents, place them in the drum before loading the laundry. 2 Add cleaning products. • Add the proper amount of HE (High-Efficiency) detergent to the detergent dispenser. • If desired, add bleach or fabric softener to the appropriate areas of the dispenser drawer. • Do not place liquid or powdered detergent packs, or gel or tablet detergents in the dispenser. 3 Turn on the washer. • Press the Power button to turn on the washer. 4 Select a cycle. • Turn the cycle selector knob or press the cycle buttons repeatedly until the desired cycle is selected. • The preset wash temperature, spin speed, soil level and option settings for the selected cycle are shown. • The Normal cycle must be selected in order to change its default settings. • Pressing the Start/Pause button without selecting a cycle immediately starts the Normal cycle with the default settings. 5 Adjust settings. • Default settings for the selected cycle can be changed, if desired, using the cycle modifier and option buttons. • Not all modifiers and options are available on all cycles. A different chime sounds and the LED does not light up if the selection is not allowed. 6 Begin cycle. • Press the Start/Pause button to begin the cycle. The door locks, and the washer agitates briefly without water to measure the weight of the load. • If the Start/Pause button is not pressed within a certain time, the washer shuts off and all settings are lost.",

"How do I add cleaning products using the dispenser on LG Washer and Dryer (Model WM3998HBA)?" : "Using the Dispenser To add cleaning products to the automatic dispenser: 1 Open the dispenser drawer. 2 Load the laundry products into the appropriate compartments. • Follow the manufacturer's recommendations when adding cleaning products. 21 OPERATION ENGLISH a",

"How do I connect LG Washer and Dryer (Model WM3998HBA) to the power supply?" :
"Connecting to the Power Supply Plug the washer into a 120 V, 60 Hz grounded 3-prong outlet.",

"What are the power supply warnings for LG Washer and Dryer (Model WM3998HBA)?" :
"WARNING• Do not use a worn or damaged power cord or power plug. Replace or repair it immediately. Failure to do so may result in death, fire, electric shock, or malfunction. • Do not modify the power cord and plug provided with the appliance. Do not damage it when installing or moving the appliance. Doing so may result in death, fire, electric shock, or malfunction. • Make sure that the appliance is grounded. • Connect this appliance to a grounded outlet conforming to the rating prior to use. Failure to do so may result in fire, electric shock, or malfunction. • Do not damage or cut off the ground prong of the power cord. Doing so may cause death, fire, electric shock, or product malfunction. • Improper connection of the equipment grounding conductor can result in risk of electric shock. Check with a qualified electrician or service technician if you are in doubt as to whether the appliance is properly grounded. If the plug does not fit the outlet, have a proper outlet installed by a qualified electrician. • The appliance and outlet must be positioned so that the plug is easily accessible.",

"What minimum requirements are needed to use Withings Body+ (v4.1 (October 2020))?" :
"Minimum Requirements Internet access Access to the Internet is required to: • Download the Withings Health Mate® app, • Set up your Withings Body+, • Upgrade your product whenever an update is available. For more details, refer to "Specifications" on page 52. We recommend using the app on a device connected to the Internet to enjoy all features. Smartphone or device An iOS device or an Android device (with operational Bluetooth and Wi-Fi or 3G/4G) is required to: • Set up your Withings Body+, • Retrieve data from your Withings Body+, • Access specific functions of your Withings Body+. Bluetooth Low Energy (BLE) compatibility is recommended to install your Withings Body+. For more details, refer to "Specifications" on page 52. OS version You need iOS 8 or above to install and run the Withings Health Mate® App on an iOS device. You need Android 5.0 or above to install and run the Withings Health Mate® App on an Android device. Withings Health Mate® app version We recommend that you use the latest available version of the Withings Health Mate® app to have all the latest features available.",

"How do I install the Withings Health Mate app to set up Withings Body+?" : "Installing the Withings Health Mate® app If the Withings Health Mate® app is not already installed on your device, perform the following steps: 1. Type go.withings.com in your device's web browser. 2. Tap Download on the App Store or on the Play Store. 3. Tap Get. The installation process starts.",

"What is the overview of installing Withings Body+ in Wi-Fi vs Bluetooth?" : "Installing your Withings Body+ Overview Installing your Withings Body+ in Wi-Fi gives you access to all the features and screens available. Installing your Withings Body+ in Bluetooth limits the features and screens available. For example, you can't use the Weather screen and the Steps screen, as they require access to the Internet. You can change the configuration of your

Withings Body+ anytime you want. Refer to "Changing the configuration of your Withings Body+" on page 19 for more information. Note that once you've installed your Withings Body+ on your account, all the users of the account can use it. You are also free to install it on various accounts. There is, however, a limit of eight users per scale at the moment.",

"How do I install Withings Body+ without an existing Withings account?" : "Installing your Withings Body+ without an existing account. Refer to """,

"How do I install Withings Body+ with an existing Withings account?" : "Installing your Withings Body+ with an existing account. 1. Pull the tab out of the battery compartment if it's the first time you install your Withings Body+. 2. Press and hold the button at the back of the scale for three seconds. The scale displays go.withings.com. 3. Open the Withings Health Mate® app. 4. Go to Devices. 5. Tap +. EN - 15 Withings Body+v4.1 | October 2020. 6. Tap Scales. 7. Tap Body+. 8. Tap Install. EN - 16 Withings Body+v4.1 | October 2020. 9. Press the pairing button at the back of the scale for three seconds and tap Next. 10. Tap Next. 11. Tap Pair twice (iOS only). 12. Tap Next. EN - 17 Withings Body+v4.1 | October 2020. 13. If you want your scale to sync in Wi-Fi once it's installed, perform the following steps: a. Tap Quick setup to use the same Wi-Fi network as your mobile device or Setup another network to use another one. b. Tap Allow. You will need to update the Wi-Fi configuration if you change the network name or password. Refer to "Changing the configuration of your Withings Body+" on page 19 for more information. 14. If you want your scale to sync in Bluetooth only once it's installed, tap I don't have a Wi-Fi Network. 15. Tap Done. The Withings Health Mate® now prompts you to select your target weight. EN - 18 Withings Body+v4.1 | October 2020",

"How do I select a weight goal when setting up Withings Body+?" : "Selecting your weight goal. To select your weight goal, perform the following steps: 1. Tap and slide up or down to select your target weight. 2. Tap Next. 3. Tap and slide up or down to select the pace at which you want to achieve your weight goal. 4. Tap OK. EN - 19 Withings Body+v4.1 | October 2020",

"How do I connect the SmartHub to the Internet for Arlo Ultra Series 4K UHD Wire-Free Security Camera System (Arlo Ultra Camera and SmartHub)?" : "Connect your SmartHub to the Internet. The SmartHub connects to your home network and allows you to view your camera streams from anywhere. 1. Connect the SmartHub to your router with an Ethernet cable. 2. Connect the AC adapter to the SmartHub and plug it in. The LED on the front of the SmartHub lights.",

"What does the SmartHub LED indicate on Arlo Ultra Series 4K UHD Wire-Free Security Camera System (Arlo Ultra Camera and SmartHub)?" : "The SmartHub LED. The SmartHub LED indicates the status of the SmartHub. The SmartHub blinks once when it's first powered on. Then the LED lights as follows: • Solid blue. The SmartHub is connected to the Internet. • Slow blinking blue. The SmartHub is ready to sync and pair with a camera or is connecting with a camera. • Fast blinking blue. The SmartHub paired with a camera. • Solid amber. An error occurred or something is wrong with the connection. • Slow blinking amber. The SmartHub can't connect to the camera. The camera can't be found, is out of range, or another

connection error occurred. • Alternating blue and amber. A firmware update or a reset is in progress.",

"How do I use the Arlo app for installation and setup of Arlo Ultra Series 4K UHD Wire-Free Security Camera System (Arlo Ultra Camera and SmartHub)?" : "Use the Arlo app for installation and setup. You must use the Arlo app to install and set up your SmartHub and Arlo Ultra Camera. The Arlo app guides you through setup: 1. Create your Arlo account. You use the same account to manage all your Arlo devices. 2. Connect the Arlo SmartHub to the Internet and add it to your account. 3. Add each Arlo Ultra camera and pair it with the Arlo SmartHub. Once you set up your Arlo account, you can access it by using the Arlo app on a smartphone or tablet, or from a computer using a web browser. If you're using a computer, enter <https://my.arlo.com/#/login> in the address bar of the browser. After installation, you can use the Arlo app to view your camera feed, customize alerts and notifications, create schedules for your cameras, and more.",

"How do I insert the battery into the Arlo Ultra camera for Arlo Ultra Series 4K UHD Wire-Free Security Camera System (Arlo Ultra Camera and SmartHub)?" : "Insert the battery into your camera. Your Arlo Ultra camera consists of two parts: • The camera and battery. • The camera housing. Note: The battery comes partially charged. We recommend that you fully charge the battery before using your camera. See Charge your camera battery on page 10. To insert the battery: 1. Align the battery and insert it into the battery compartment. The battery only inserts one way. The LED on the Arlo Ultra camera blinks blue. 2. Insert the camera into the camera housing by pushing down on both the left and right sides of the camera until it clicks into place. For information about handling batteries, see Safe Handling and usage guidelines for rechargeable batteries on page 77.",

"How do I charge the camera battery for the Arlo Ultra camera in Arlo Ultra Series 4K UHD Wire-Free Security Camera System (Arlo Ultra Camera and SmartHub)?" : "Charge your camera battery 1. Snap the magnetic power cable into the camera's power input. 2. Connect the AC adapter to the power cable and plug it in. Note: You can buy spare rechargeable batteries and charge them in the Arlo Dual Charging Station (sold separately).",

"How do I charge batteries in the Arlo Ultra dual charging station (sold separately) for Arlo Ultra Series 4K UHD Wire-Free Security Camera System (Arlo Ultra Camera and SmartHub)?" : "Charge batteries in the Arlo Ultra dual charging station (sold separately). Your Arlo Dual Charging Station charges one or two batteries for your Arlo Ultra cameras. To charge batteries in the charging station: 1. Connect the power adapter to the charging station. 2. Plug the power adapter into an indoor electrical outlet. 3. Insert one or two Arlo rechargeable batteries.",

"How do I replace an Arlo Ultra camera battery for Arlo Ultra Series 4K UHD Wire-Free Security Camera System (Arlo Ultra Camera and SmartHub)?" : "Replace a camera battery. You can leave the camera housing in place so the camera position stays the same. 1. Release the Arlo Ultra camera from the camera housing. Press the button on the charging port underneath the Arlo Ultra camera. The camera clicks as it disengages from the camera

housing.2. Pull the camera all the way out of the camera housing.3. Remove the battery by pulling on it until it slides out of the camera.4. Align the battery and insert it into the battery compartment.The battery only inserts one way.The LED on the Arlo Ultra camera blinks blue.5. Insert the camera into the camera housing by pushing down on both the left and right sides of the camera until it clicks into place.",

"What does the Arlo Ultra camera LED mean on Arlo Ultra Series 4K UHD Wire-Free Security Camera System (Arlo Ultra Camera and SmartHub)?" : "The Arlo Ultra Camera LEDThe LED on the camera lights when the camera is powered on. The LED changes color and blinks depending on the battery charge and to indicate the status of activities such as pairing the camera and updating the camera firmware. • Slow blinking blue. The camera is in the process of pairing with the SmartHub. • Fast blinking blue. The camera paired with the SmartHub. • Blinking amber. The camera is out of range, a connection error occurring during pairing, or the camera battery charge is low (15% or less). • Alternating blue and amber. The camera failed to pair with the SmartHub, or a firmware update is in process, or a reset is in process.",

"What tips for optimal WiFi performance are recommended for Arlo Ultra Series 4K UHD Wire-Free Security Camera System (Arlo Ultra Camera and SmartHub)?" : "Tips for optimal WiFi performancePlace your Arlo Ultra camera in a location with a good WiFi signal to the SmartHub.The distance between WiFi devices can affect the WiFi signal: • Maximum recommended distance. Place your camera a maximum of 300 feet (90 meters) from the SmartHub. The maximum line-of-sight range of 300 feet is reduced by each wall, ceiling, or other major obstruction between the camera and SmartHub. • Minimum recommended distance. To reduce WiFi interference, place the SmartHub 6 feet (1.8 meters) away from your WiFi router. Place your Arlo Ultra cameras 10 feet (3 meters) away from the SmartHub, and allow at least 6½ feet (2 meters) between cameras.The following materials can reduce WiFi signal strength if they are located between WiFi devices such as your SmartHub and Arlo Ultra cameras: • Unusually thick walls and ceilings • Brick • Concrete • Stone • Ceramic • Glass, especially mirrors • Metal • Large quantities of water, such as the water in a fish tank or water heaterFor information about optimizing 4K streaming with multiple Arlo Ultra cameras, see the Arlo support article <https://kb.arlo.com/000062190/How-can-I-reduce-connectivity-issues-when-I-live-stream-in-4K-on-multiple-cameras>.",

"How do I install a magnetic mount for the Arlo Ultra camera in Arlo Ultra Series 4K UHD Wire-Free Security Camera System (Arlo Ultra Camera and SmartHub)?" : "Install a magnetic mount1. Select a location for the mount up to 6.5 feet (1.9 meters) high.*2. Fasten the mounting screw into a wall.If you're working with drywall, use the plastic drywall anchor that we provide.Use the plastic stopper to help guide how far to screw it into the wall.3. If you're using your Arlo Ultra camera connected to a charging cable, wrap the excess charging cable around the back of the mount.4. Snap the magnetic mount onto the screw and the stopper.The mount clicks into place.5. Attach your Arlo Ultra camera to the wall mount.The magnet in the mount holds the camera onto the mount.6. Adjust the Arlo Ultra camera to

your preferred viewing angle. Note: You can replace the battery in Arlo Ultra cameras without removing the camera housing from the indoor wall mount.",

"How do I install the Arlo Outdoor Mount for Arlo Ultra Series 4K UHD Wire-Free Security Camera System (Arlo Ultra Camera and SmartHub)?" : "Install the Arlo Outdoor Mount. Some Arlo Ultra kits include an outdoor screw mount. Screw mounts are also sold separately. 1. Place the outdoor mount and secure it with screws. If you're mounting the camera on drywall, use the drywall anchors we provide. 2. Attach the camera to the mount. 3. Adjust the camera angle.",

"How do I connect the Arlo Ultra camera to the Arlo solar panel (sold separately) for Arlo Ultra Series 4K UHD Wire-Free Security Camera System (Arlo Ultra Camera and SmartHub)?" : "Connect your camera to the Arlo solar panel (sold separately). The Arlo solar panel lets you harvest power from the sun to keep your Arlo Ultra camera battery charged. The solar panel with cable comes with a mount and mounting screws. To connect a solar panel to your Arlo Ultra camera: 1. Install the solar panel mount near your camera. 2. Attach your solar panel to the mount. 3. Connect your camera to the solar panel power cable.",

"What is the Arlo Ultra camera field of view and what settings are available for Arlo Ultra Series 4K UHD Wire-Free Security Camera System (Arlo Ultra Camera and SmartHub)?" : "Your Arlo Ultra camera's field of view. The field of view is the area in which the camera can detect motion. You can set the field of view to Full (120 degrees), Wide (155 degrees), or Super wide (180 degrees). Each field of view setting auto corrects the image to reduce the fisheye effect. The Full setting completely eliminates the fisheye effect. 120° 155° 180°",

"How do I change the field of view for the Arlo Ultra camera in Arlo Ultra Series 4K UHD Wire-Free Security Camera System (Arlo Ultra Camera and SmartHub)?" : "Change the field of view. 1. Open the Arlo app. 2. Tap Settings > My Devices. 3. Select the camera. 4. Tap Video Settings > Video Mode. 5. Tap a field of view to automatically apply it to your camera.",

"How should I position the Arlo Ultra camera to detect motion in specific areas for Arlo Ultra Series 4K UHD Wire-Free Security Camera System (Arlo Ultra Camera and SmartHub)?" : "Position your camera to detect motion in specific areas. You can mount and aim your Arlo Ultra camera in different ways to optimize the camera's ability to detect motion in specific areas. The lower two-thirds of the camera's field of view is the motion-sensitive part of the image. Aim the camera so that any motion you wish to detect appears within this part of the image. If you want to monitor motion closer to the camera, such as visitors to your front door, mount the camera at least 6.5 feet (1.9 meters) high*. This angle works well to avoid motion alerts for movement in the top third of the image, such as vehicles driving by. To monitor motion occurring farther away, such as children playing on a lawn, aim the camera higher to frame the area within the lower two-thirds of the image. It's best to position the camera so that motion is moving from side-to-side across its field of view rather than directly toward or away from the camera. Also, though the camera can detect motion up to 25 feet (7.6 meters) away, the best area for motion detection is 5 to 20 feet (1.5 to 6 meters) from the camera position.",

"How do I use camera positioning to aim the Arlo Ultra camera for Arlo Ultra Series 4K UHD Wire-Free Security Camera System (Arlo Ultra Camera and SmartHub)?" : "Use camera positioning to aim your camera. Camera positioning is available only when the camera is not streaming, recording motion, or using the Motion Detection test. During camera positioning, the camera streams video as fast as possible, without buffering. You can aim your camera while watching on your smartphone and making near real-time adjustments to the camera position. This means that you might see lower-quality video while you are positioning your camera. 1. Open the Arlo app. 2. Tap Settings > My Devices. 3. Select the camera. 4. Tap Device Utilities > Camera Positioning. The camera starts streaming video. The signal strength bar indicates the Wi-Fi signal that your Arlo Ultra camera is receiving at its current location.",

"How do I test motion detection for the Arlo Ultra camera in Arlo Ultra Series 4K UHD Wire-Free Security Camera System (Arlo Ultra Camera and SmartHub)?" : "Test motion detection. You can use the motion detection test to find the right motion sensitivity setting for each camera. 1. Open the Arlo app. 2. Tap Settings > My Devices. 3. Select the camera. 4. Tap Device Utilities > Motion Detection Test. 5. Move in front of the camera. During this test, the camera LED blinks amber when motion is detected. 6. Move the slider to adjust the motion sensitivity level as needed. 7. Edit the rule for your camera to enter the motion sensitivity level that you want to use. See Change motion sensitivity on page 35.",

"How do I arm the Arlo Ultra camera to detect motion for Arlo Ultra Series 4K UHD Wire-Free Security Camera System (Arlo Ultra Camera and SmartHub)?" : "Arm your camera to detect motion. You control when your camera detects motion and the rules it uses to record and alert you by selecting a mode. The Arlo app comes with four modes, Armed, Disarmed, Schedule, and Geofencing. You can customize each mode and you can also create custom modes. For information about how to do this, see 6. Modes, Rules, and Alerts on page 33.",

"What is Google Nest Hub (Google Nest display) and what does it provide?" : "Introducing Google Nest Hub. Google Nest Hub provides help at a glance in any room at home. With the Google Assistant built-in, you'll always get your best and latest shots from Google Photos. Plus, view and control your connected devices from a single dashboard. youraddress. • To set up all other devices, at the top left, tap the Add icon Setup device New device. • Follow the remaining steps. 4. You'll be able to opt out of some settings, like Voice match or Personal results. You can change these settings at any time after you complete setup.",

"What can I do next after setting up Google Nest Hub (Google Nest display)?" : "What to do next • Explore what you can do on your speaker or display: Learn how to play podcasts, make phone calls, control smart devices, and much more. • Change your device settings: Change language, Personal results, accessibility, and other device settings. • Set up Voice Match. • Change your Google Assistant settings: Set up your music, TV, and news services. • Change your Google Account settings: Set up and customize Google Account information and features. • Listen to music on your speaker or display.",

"How do I plug in Google Nest Hub (Google Nest display)?" : "B. Plug in your Google Nest or Home speaker or display You can plug in your Google Nest or Home speaker or display by following these two steps: 1. Plug the power cable into your speaker or display. 2. Plug the power adapter into a wall outlet. It's important to only use the power cable that came in the device's box. Once the device is plugged in, set up your Google Nest or Home device. Important: The device must be plugged into a wall outlet at all times to work. It doesn't have a battery.",

"Why must Google Nest Hub (Google Nest display) stay plugged into a wall outlet?" : "Important: The device must be plugged into a wall outlet at all times to work. It doesn't have a battery.",

"What is included in the box for Fitbit Aria Wi-Fi Smart Scale (Model FB201B, FB201W)?" : "What's included Your Fitbit Aria Scale box includes: • The Fitbit Aria Wi-Fi Smart Scale • 4 AA batteries, already installed • Aria Quick Start Guide",

"How do I power on Fitbit Aria Wi-Fi Smart Scale?" : "Power on your scale Your Aria scale is shipped with 4 AA batteries that have been previously installed. Pull the small plastic tab sticking out of the battery compartment to remove the tab and power on your scale. WARNING • Do not use if you have a pacemaker or any other internal medical device. • Do not use if you are pregnant. • Not intended for use by children under the age of 10. • Aria should not be used to diagnose or treat any medical condition. Always consult your physician to determine what is ideal for you. CAUTION • Slippery when wet.",

"What networking requirements are needed to set up Fitbit Aria Wi-Fi Smart Scale?" : "Networking Requirements The Fitbit Aria connects directly to your home's wireless network and supports the following network configurations: • Wireless 802.11b standard • WEP / WPA / WPA2 personal security • Automatic (DHCP) IP setup (static IP configuration not supported) Aria requires an 802.11b-compatible network to connect and sync your scale data to your Fitbit dashboard.",

"How do I set up Fitbit Aria Wi-Fi Smart Scale using a phone or tablet?" : "Setting up your Aria Follow the steps below to set up your Fitbit Aria. If you prefer to watch a video,

visit <https://www.youtube.com/watch?v=D7Q5FvHHPJo>. 1. On your mobile device, go to <http://www.fitbit.com/scale/setup/start>. 2. Tap Get Started. 3. Log in to your existing Fitbit.com account or create a new one. 4. Name your scale and insert your initials, then tap Continue. 5. Follow the onscreen instructions to put your scale into setup mode, then tap Continue. 6. Follow the onscreen instructions to connect your mobile device to the wireless network that is broadcasting from your Aria. To do this, you will need to leave the browser window and go to your smartphone's Wi-Fi settings. In your list of available wireless networks, look for the word "Aria" followed by a series of six letters and numbers, and connect to this option. 7. When you've connected to your Aria's network, return to your browser and click I'm connected. The setup software will show all visible networks in range. 8. Select your network from the list. 9. If your network is password-protected, enter your password in the box to the right and click Connect. 10. Enter the wireless network password and tap Submit. When you've submitted the correct password, your scale will save the network credentials, join your Wi-Fi network, link to your Fitbit.com dashboard, and show a checkmark once linking is successful. 11. Ensure that your mobile device has switched back to your home network and tap I'm Connected!",

"How do I verify that Fitbit Aria Wi-Fi Smart Scale setup completed and the scale is linked to my Fitbit.com account?" : "Verifying your scale setup Now that you've linked your scale to your Fitbit.com account, you'll want to verify that the scale appears correctly on your profile. 1. Go to <http://www.fitbit.com/login>. 2. Login to your Fitbit.com account. 3. Click the gear icon at the top-right, and look for the Aria listed in the drop-down menu. If you don't see your scale in this menu, your setup may not have completed properly or you may be logged into a Fitbit.com account that is not associated with your scale. See <http://www.fitbit.com/support> for further troubleshooting.",
